MICRO-FIBER CLOTHS

Now Available in **BULK BOXES!**

new!

Wet Cleaning Cloth (Blue)

Used for general wet or dry applications. Works best when sprayed with a light water mist to deep clean.

Dry Tack Cloth (Red)

The woven terry cloth has a low profile to resist snagging and help pick up embedded debris. This cloth is used in a dry dusting application.

Polishing Cloth (Yellow)

Streak free cleaning of mirrors, optical lens and high polishing items.

Micro-fiber is a single fiber with a thickness less than a human hair that has been split 16 times and woven into various products. The surface area of the micro-fiber product is increased over 15 times, creating millions of spaces between the fibers which trap dirt, grime or liquids, making this product one of the most absorbent materials.

These "V" shape splits, while less than a micron in size, have edges that collect debris as opposed to pushing debris away. These particles are trapped in between the fibers and can be rinsed or machine washed to release heavily embedded particles. Micro-fiber products can be washed up to 300+ times without losing its cleaning and trapping abilities. Cleaning with micro-fiber products save you labor time, and additional costs of multiple cleaning products and chemicals.

Use the micro-fiber products dry for general dusting.

To clean or remove spills, stains or grime lightly dampen the product for the best results. All micro-fiber products can be used with or without chemicals.

CLOTHS

PART NUMBER	SIZE	QTY
076607 05300	16" x 16"	20
076607 04025	16" x 16"	20
076607 05301	16" x 16"	20
